

A Living Landscape

Over 100 schemes across the UK

What is A Living Landscape?

It is a strategic vision of our landscape that will help us create a resilient and healthy environment. We are identifying key areas to protect for wildlife, enlarging, improving and joining them up across the UK: on nature reserves, in towns and cities, and in partnership with hundreds of other land-owners. There are now more than 100 Living Landscape schemes around the UK. These schemes are creating inspirational, accessible landscapes – full of wildlife and rich in opportunities for learning, health and wellbeing, as well as sustainable economic development.

A Living Landscape Over 100 schemes across the UK
